content, while the West may stand epeciator and laugh at the sport. The 3,000 miles of Railroads centering here will continue so be run regularly, conveying the never-cossing streams of travel here, and away, and transporting the agricultural products of the West to Chicago, and the goods of the east hither for distribution to their millions of consumers. The banks of Illinois and Wisconsin are based upon Size stocks—not railroad or canal schemes but, one redit of the State Sovereignties. With caraful Auditors of State those banks thus secured, can hardly fall, so that the holder of their riotes. hardly fail, so that the holder of their notes ean lose anything. We regard the tanks of the Western States as sounder, and more re-sponsible than those of the Eastern States. We can see no financial crisis impending in the East that will shake the Banks of the West, or the well managed ones in the East. When we speak of Western Banks we do not include among the strong, safe and solvent, by any, means, the rag mills of Nebrasks, or the Wild Cast is rigalation.

among the strong, safe and solvent, by any means, the rag mills of Nobraska, or the Wild Cats in circulation, owned by brokers in Illiston or elsewhere. Give all that class of stuff a wide berth.

The Reasse of the West is made out of its agricultural products. The crops of this year are immease, and the quantity for products that will be sent to markel for the next twelve or eighten months, will surpass all previous years. Hard times are out of the question so long as wheat, corn, cattle and hogs hold out.

company with Rev. Jin. Claze of the Grayville Circuit, and as Bro. M. was collecting money to finish
pering for a house of worship lately built by the
Rethodiat society in Cairo, the conversation very
anterally turned upon his good or ill success at various times and places. I read to him that remarks of
the Taracraw upon Doughas' donation to the Southern
Methodiat Church in Washington, which remarks
Mr. Manier heartily sodorous and the said that hast
October he was in Quincy on the same butness as
now, and as Judge Dougha was in the city, many
of his (Manier's) friends pressed him to sail upon
himmed at their solicitation he did so. He presented
the case as follows: This (bis) was the only Provestant church in Cairo, and the first that had ever you to withdraw from this Institution, are now so far removed, as to present no serious ob-stacle to your return. President Blanchard has consented to resume his former place in the Faculty, by invitation of the Executive Committee, and the place of Prof. Gale will be filled by an experienced and successful Tracher. Teacher.
Such is now the state of our affairs, that we believe no important charges will, in future, be made in the Faculty, without the united action of the Board of Trustees, and the cordial concurrance of loss when from

tion of the Board of Trustees, and the cordial concursence of "loss whose have and patronage contribute most to the prosperity and useful uses of the Institution.

With the exception of some alienation of feeling, and division of counsels, among its guardians and fresels, the condition and prospects of the college were never so good as at the present time. Our two new and spacious buildings, the one for the Male and the other for the Female department, are now Moisbed, and will be ready for use at the opening of the College year, on the Third of September.

It is with peculiar pleasure this we amounce these arrangements, which indicate the continued and increasing prospecity of our College. It has been a fivored Institution. But the means of its usefulness are now greatly augmented. The Trustees have the ability and disposition to add something to its educational advantages every year, until they are complete in every department. Let the friends of the College implore for it the favor of God, and we trust that our past troubles will fursish a lesson of wisdom for our guidance, until those very troubles shall be forgotten in the loy of our future prosperity and success.

We were relieved from a serious anxiety, the other morning, by seeing in a cotemporary print, believed to be in the secrets of the Adamsteration, an authentic contradiction of the rumor which had been walking the rounds of the newspapers of the impending resignation of our valuable Minister at the Court of her Cathelic Majesty. We are assured that the report that the Hon. Angus, us Cassar Dodge entertains any design of deserting the diphomatic service of his country is totally without foundation. He has not resigned—but on the other hand, he is resigned to encounter yet longer the perils attendant on the receipt of so much of the root of all evil as \$12,500 per anum, and to suffer all the pangs of exile which they endure who have left the country for their country's good.
